Designed to slit the toner wire and webbing off flat drop fiber cables, this toner wire slitter precisely separates the copper toner wire from flat drop cables to make cable preparation quick and easy. This toner wire slitter also features the following:

- Blade is fixed in position to remove the toner wire from all standard sized FTTx toneable flat drop cables with no adjustments needed
- Perfect for slitting the toner wire off Corning SST™, Commscope FHD, FHBD, Prysmian Resilink™TF, Superior Essex 6T, and other flat drop cables
- Tool completely closes around the cable, keeping your hands safe from accidental nicks and cuts
- Blade can slit in both push and pull directions for greater versatility
- Compact design with tethering hole for maximum portability
- Includes 3 additional replacement blades, stored in the housing for convenience
- Lifetime Warranty
